

SINGLE SESSION PRICING BIG SKY AUTISM PROJECT

We encourage anyone seeking services to apply for the Income Based Payment (IBP) Program. The IBP Program uses the Federal Poverty Guidelines (FPG) Table, household size, income from all sources, and allowable deductions to find the Adjusted Gross Income (AGI) for your household. The AGI is then used to qualify you for a reduced fee per session for the Adaptive Exercise Programs and the Fit4U Programs. Fee Reductions range from about 40% - 80% off per session depending on your AGI. See Income Based Payment Program and Sliding Fee Schedule

If your household does not qualify for the IBP Program, you will automatically be enrolled in the Alternative Payment Arrangement (APA) Program. The APA allows for a 5% - 25% fee reduction per session. The APA Fee Reduction is on a case by case basis and determined by the Board of Directors or their designee. Individuals may apply for the APA Program without applying for the IBP Program. See Alternative Payment Arrangement Program.

If you are found ineligible or choose not to participate in both the IBP and APA Programs, or do not want a fee reduction, a Standard Payment Plan is **required** to be in place prior to receiving services. See Standard Payment Plan.

It is your choice and responsibility to apply to the program that best suits your situation and needs. All information received by BSAP is kept confidential and will not be shared unless written consent is provided by the responsible party or compelled to do so by legal authorities.

Single Session Pricing applies to the Adaptive Exercise Programs and the Fit4U Programs exclusively. Workshops & Classes are priced separately and do not always qualify for the IBP or APA Programs. Services that do or do not qualify for fee reductions will be noted and advertised as such.
